

# M R Jeevan

Front End Developer

+91 8762198873 | [mrjeevan2000@gmail.com](mailto:mrjeevan2000@gmail.com) | [LinkedIn](#) | [Portfolio](#)

Skilled frontend developer with 3 years of experience specializing in building scalable, high-performance web applications. Proficient in **React** and **Next.js**, and modern front-end technologies. Adept at crafting intuitive UIs, optimizing performance, and integrating APIs. Currently expanding expertise by building full-stack applications.

---

## SKILLS

**Frameworks & Libraries:** React.js, Next.js, Redux Toolkit, React Router, Three.js, AntD, Material-UI, Shadcn/UI

**Frontend:** JavaScript (ES6+), TypeScript, HTML, CSS, SCSS, Bootstrap, Tailwind CSS, Styled Components

**Data Visualization:** amCharts, DevExtreme, Highcharts, Recharts, Chart.js, D3.js

**SEO & Performance:** SEO Best Practices, Google Web Console, Web Vitals Optimization, PWA, SSG, SSR, CSR

**DevOps & Tools:** Git, GitHub, Vercel

**CMS & APIs:** REST APIs, Firebase, Strapi (for headless CMS & i18n)

**Other:** Authentication (NextAuth, JWT), Performance Optimization

**Languages:** English, Hindi, Kannada

---

## WORK EXPERIENCE

### ThoughtClan Technologies Pvt Ltd

Oct 22 – Present

Software Engineer

- Developed and optimized responsive UI components using **Next.js**, **React**, **Redux Toolkit**, React Router and **Material-UI**.
- Ensured high-quality user experience by leveraging **SSG**, **SSR**, and **CSR** principles.
- Worked extensively with **JavaScript**, **TypeScript**, **HTML**, **CSS**, **Tailwind CSS** and **Bootstrap**.
- Focused on performance optimization and maintaining best practices in front-end development.

### ThoughtClan Technologies Pvt Ltd

Apr 22 – Oct 22

Intern

- Gained hands-on experience with **CSS**, **JavaScript**, **Redux.js**, **Tailwind CSS** and other front-end technologies.
- Developed multiple PoCs leveraging Next.js SSR features and integrated **Strapi for CMS** solutions.
- Assisted in building and maintaining UI components for real-world applications.

### Settyl

Apr 21 – Aug 21

Full-Stack Developer Intern

- Implemented UI from UX designs while building reusable React components with **Styled Components**.
  - Implemented Material-UI components and integrated **webhooks** to enhance workflow automation.
  - Collaborated with a team to create engaging user interfaces and enhance development skills.
-

## PROJECTS

### EXPO365 | Frontend Developer | June 2024 – Present

A SaaS-based, video-first trade and career showcase PWA that enables organizations to create branded apps for lead generation, talent attraction, and business networking. The platform includes End-User, Organization Admin, Partner Admin, and Super Admin dashboards. **Contributed across all personas**, focusing on UI development, state management, API integration, and performance optimization.

#### Key Contributions:

- Redesigned and optimized the End-User UI with **AntD** and **SCSS**, improving usability and ensuring a seamless multi-device experience.
- Standardized UI components and design patterns, reducing redundancy and improving maintainability.
- Cleaned up unused assets, removed obsolete components, and improved state management by migrating to **RTK**, reducing **local storage dependency**.
- Integrated **Bitly** API, enabling dynamic link generation for seamless microsite sharing, improving accessibility and engagement.
- Upgraded **SEO/PWA features**, refined metadata, and optimized keywords to enhance accessibility and reach.

**Tech Stack:** React, AntD, Bootstrap, Redux Toolkit, Context API.

**Team Size:** 5

### Volza | Frontend Developer | Dec 2022 – Nov 2023

Volza is a web-based platform providing global export-import trade data for 209+ countries. The project involved revamping three applications—Internal App (data management & analytics), Website (public-facing platform with Strapi-powered UI), and Web App (paid trade intelligence platform).

#### Key Contributions:

- **Dynamic Component Rendering:** Integrated Strapi CMS to control UI component rendering, enabling non-technical teams to modify layouts dynamically.
- **Internationalization (i18n):** Configured Strapi's i18n for multi-language support, using react-intl & i18next for frontend translations.
- **Modern, Scalable UI:** Developed a responsive UI with **React.js**, **TypeScript**, and **Tailwind CSS**, ensuring consistency across all apps.
- **Strapi CMS Integration:** Managed dynamic content for blogs, service pages, and trade insights, enabling API-driven updates.
- **Advanced Data Visualization:** Customized **amCharts**, **DevExtreme**, and **Highcharts** for interactive trade analytics, trend tracking, and dynamic filtering.
- **Performance & State Management:** Optimized API calls using **RTK Query**, **Redux Toolkit**, and **lazy loading** for faster load times.
- **SEO & Performance:** Enhanced website performance with **Next.js & SSR**, improving SEO and load speed.
- **Custom UI Library:** Developed a reusable **npm package UI component library** for uniform design across applications.

**Tech Stack:** Next.js, TypeScript, Tailwind CSS, Strapi (Headless CMS), amCharts, DevExtreme, Highcharts, RTK Query, Redux Toolkit, Context API, react-intl, i18next.

**Team Size:** 28
